Lathing Accessories for rigid poly (vinyl chloride) (PVC) compounds meeting ASTM C841 and C1063

SCOPE

This submittal covers vinyl accessories installed with interior and exterior Portland Cement-Based Plaster. All accessories shall have perforated or expanded flanges to permit complete embedment in the plaster, to provide for accurate alignment, and to secure attachment of the accessory to the underlying surface in receiving the specified thickness of plaster. The selection of the accessory shall be determined by numerous factors not limited to: the project location, climate and environment resulting from excessive salt, moisture, humidity, pollution, wear and temperature changes.

TYPES OF ACCESSORIES

This submittal includes the following types of accessories used for plaster and stucco installations: corner beads, casing beads, expansion joints, control joints, weep screeds, reveals, soffit vents and miscellaneous components.

MATERIALS

Rigid Poly (Vinyl Chloride) (PVC) compounds meeting ASTM 4216 for exterior applications
ASTM 1784 for interior applications

THICKNESS OF BASE MATERIALS

These minimum thicknesses meet both ASTM C841 and ASTM C1063 Table 1.

FINISH

PVC shall be mill finish and shall be compatible with standard lathing and paint finishes. Selected profiles come in colors.

COLORS

Standard color is white. Select profiles can be specified and ordered with the exposed area in tan, brown or gray.

tan

brown

gray

COMBUSTIBILITY / FIRE RESISTANCE

Rigid vinyl components are self extinguishing, and do not support combustion once the flame source is removed. Therefore rigid vinyl will not cause, re-ignite or spread a fire.

PACKAGING AND PACKAGE MARKING

Standard length of an AMICO accessory is 10-ft long. Other length by product are offered. Longest possible lengths shall always be installed to avoid joints. Each factory box shall be marked with manufacturer's name, style of accessory and country of origin.

CERTIFICATION

When required a certification that products meets the requirements of ASTM C1063 and ASTM C841 shall be provided.

VINYL CONTROL JOINT WITH REMOVABLE TAPE

FOR STUCCO AND PLASTER INSTALLATIONS

AMICO Vinyl Control Joint with optional removable tape is an improved version of the traditional "M" type joint. This design provides ground returns to better lock into the stucco.

Product Submittal	Product Number	Ground Description
	AMCJX-250	1/4"
	AMCJX-380	3/8"
	AMCJX-500	1/2"
	AMCJX-580	5/8"
	AMCJX-750	3/4"
	AMCJX-780	7/8"
Each profile has an overall width of 3 1/4"		
Standard Length is 10-Feet		

FINISH

The finish on all AMICO vinyl stucco accessories is compatible with standard lathing and paint finishes.

REFERENCES

PVC complies with ASTM D4316 and ASTM D1784
 Meets IBC 2510 and IBC 2511
 Refer to ASTM C1063 for support spacing, lath selection, fastener selection and further information regarding the proper installation of metal lath and accessories.
 Meets Buy American Procurement Requirements
 Made in the United States of America
 LEED: 100% post industrial recyclable content

Vinyl Control Joint

Removable tape has been provided to insure a clean joint after stucco application. If joints are ordered without the removable tape, it is the contractor's responsibility to keep the joint clean of wet stucco and any other debris.

All butt joints, intersections, and ends should be joined, embedded and sealed in a quality sealant compatible with exterior paint finish.

All information contained herein is accurate as known at the time of publication. Specifications may change and AMICO reserves the right to change product specifications without notice and without incurring obligations.

VINYL MID WALL WEEP SCREED

FOR STUCCO AND PLASTER INSTALLATIONS

AMICO Vinyl Mid Wall Weep Screed performs as an unpunched weep screed allowing excess moisture to escape the back of a stucco membrane. This screed also performs as an expansion (control) joint with twin grounds. It is installed where a framed stucco surface meets a masonry (concrete block) surface. This condition is common between floors on 2-story homes and at the base of a gable receiving stucco. The unpunched flange above must be installed extending at least one inch below the framing/concrete joint. The weather barrier and lath should be installed over the solid upper flange to direct water to the foundation weep screed.

AMICO H-CLIPS are supplied with all vinyl stucco vent products. They assure stability between the end joints of the vented surface. They are provided in 2-inch, 3-inch and 4-inch lengths to correspond to the vent width of the profile. H-Clips are supplied upon request. Contact our Lakeland, Florida branch, 800-487-2511 to order.

The reveal does not perform the function of an expansion / control joint since the bead does not allow any movement.

All butt joints, intersections, and ends should be joined, embedded and sealed in a quality sealant compatible with exterior paint finish.

All information contained herein is accurate as known at the time of publication. Specifications may change and AMICO reserves the right to change product specifications without notice and without incurring obligations.

VINYL STUCCO SOFFIT VENT 3-PIECE CONSTRUCTION with H-CLIPS

FOR STUCCO AND PLASTER INSTALLATIONS

AMICO Vinyl Stucco Soffit Vent is a 3-piece bead for ventilating attic areas through the soffit. The 3-piece design also allows for expansion and contraction in the soffit. The two outside casing type components provide grounds that match the thickness of the stucco and can be used as the screed. Standard Length is 10-Feet
